Two Steps to Solve!

Date:.....

Direction: Read the word problem carefully.
Solve it in two steps. Write your final answer in the box

Jake had **40** pencil. He gave **18** to his friend,
then got **10** more from his cousin.

How many pencil does Jake have now?

Aria had **60** balloons.
She bought **25** more, but **30** popped.

How many balloons are left?
